Education

LJ University

2024 – 2028

B.Tech in Computer Science Engineering (3rd Year)

Academic Performance: CGPA 9.4 / 10.0 (Up to Semester 3)

Technical Skills

Programming Languages: Java, Python, SQL, JavaScript

Frontend Development: HTML, CSS, JavaScript, React, Vite, Tailwind CSS

Backend Development: Django, Django REST Framework, Flask, REST APIs, JDBC

Core Concepts: OOP, Data Structures, DBMS, Machine Learning, NLP

Libraries: Pandas, NumPy, Scikit-learn, VADER

Databases: MySQL, PostgreSQL, SQLite, MongoDB

Tools & Version Control: Git, GitHub

Projects

MindCompass – AI Mental Health Platform

Sem 4

Technologies: React, Vite, Tailwind CSS, Python, Django REST, PostgreSQL, Scikit-learn, VADER, JWT

- Developed a personalized mental health platform analyzing user mood, journal entries, and lifestyle metrics to generate customized wellness insights.
- Implemented AI capabilities including sentiment analysis, mood prediction, crisis detection, and intelligent activity recommendations.
- Architected full-stack application using React, Django REST Framework, and PostgreSQL with JWT-based authentication for secure user sessions.

Skill Metrics – Career & Company Matching Platform

Sem 3

Technologies: Python, Flask, NumPy, SQLite, HTML/CSS, JavaScript, Jinja2, Git

- Engineered a candidate matching algorithm utilizing weighted skill scoring to map applicant profiles against target job roles and companies.
- Identified matched vs. missing skills to provide actionable fallback role suggestions when primary matches were limited.
- Generated personalized skill-development roadmaps to systematically improve candidate match scores and employability.

MatchMate – Backend Matchmaking Engine

Sem 2

Technologies: Core Java, JDBC, MySQL, File I/O

- Co-engineered a high-performance matchmaking engine in Core Java leveraging OOP principles, lambda expressions, Predicates, and 30+ input validations.
- Managed persistent storage across normalized SQL tables via JDBC Prepared Statements and structured File I/O profile logging.

Job Portal System

Sem 1

Technologies: Core Java, OOP, Data Structures

- Built a console-based recruitment portal supporting user registration, authentication, job posting, and application management using Core Java.

Certifications

- Introduction to Object-Oriented Programming with Java** – *LearnQuest, Coursera*
- Inheritance and Data Structures in Java** – *University of Pennsylvania, Coursera*
- Crash Course on Python** – *Google, Coursera*
- Exploratory Data Analysis for Machine Learning** – *IBM, Coursera*
